

How to Lead a Mentoring Conversation.

*A mentoring conversation is one where:
people are safe to explore thoughts and feelings.*

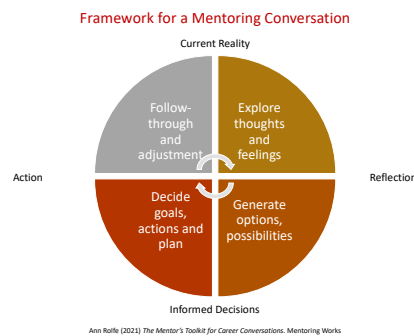

They use critical, creative and above all reflective thinking to gain insight and generate possible options.

They make informed choices as they decide on goals and actions.

They are assisted, as needed, to plan the way forward, and they are supported and encouraged as they implement their plan.

Group Discussion

What are the features of a good mentoring conversation?

Four “Umbrella Questions” (and your own alternatives)
